Install Denha on your phone

Denha is a web app: you don't get it from an app store. You install it from your browser, and it works offline.

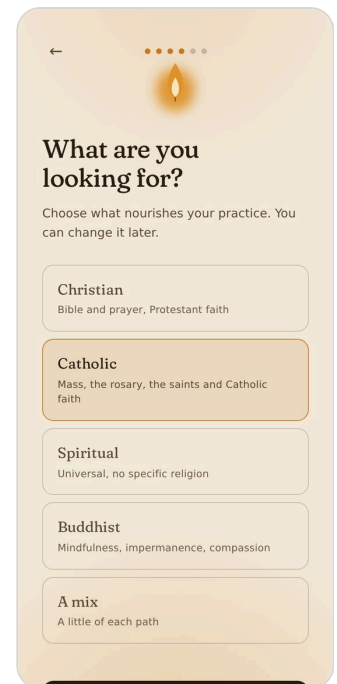

1. **iPhone:** open the link in Safari, tap the Share button, and choose “Add to Home Screen.”
 2. **Android:** open the link in Chrome, tap the  menu, and choose “Install app” or “Add to Home screen.”
 3. From then on it opens like any other app, full screen.
-

The first time

A few short questions so the content is yours.

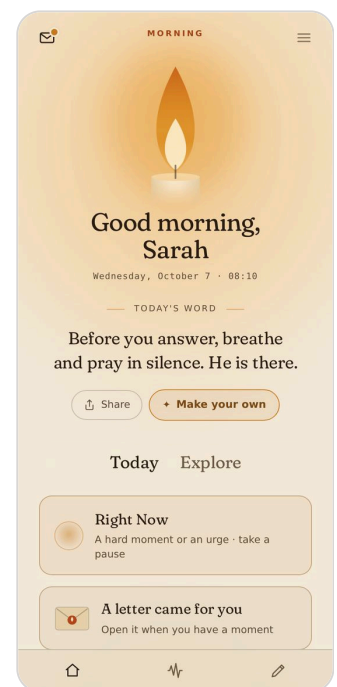

1. Choose your language and tell the app what to call you.
2. Choose your tradition: Christian, Catholic, Spiritual, Buddhist, or A mix. Your letters, your rituals, and what you see in Explore depend on it.
3. Choose what you want to grow (calm, confidence, steadiness, faith, relationships, body and rest, or purpose) and a sound.
4. When you finish, a short tour shows you each section. You can skip it and watch it anytime in Settings → Welcome tour.

Tip: You can change all of this later in Settings → Content preferences.

Today: your home screen

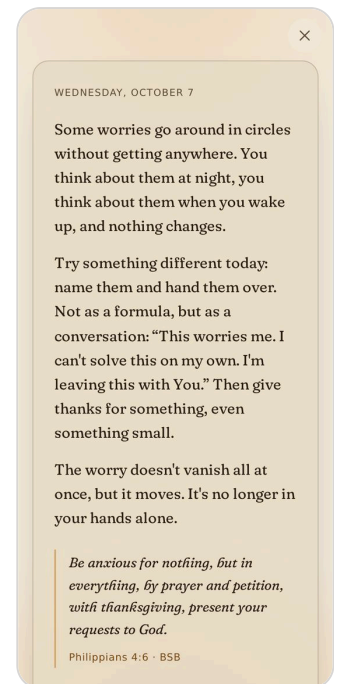

1. **The candle** grows with your practice. It never goes down and doesn't count days. Tap it for a closer look.
2. **Today's word:** a line for the day. "Share" sends it through your apps; "Make your own" lets you build your own line.
3. Top left is the envelope for your letter; top right is the Settings menu.
4. "Today" and "Explore" switch what you see below.

Your daily letter

Every morning at 5:00, a letter from your tradition arrives, written for a specific moment in life.

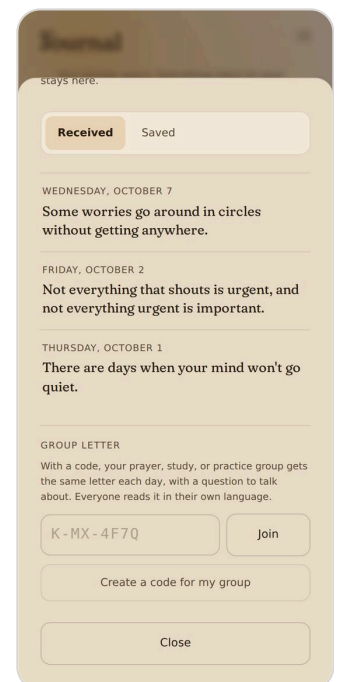

1. Tap “A letter came for you,” then tap the seal to open the envelope.
2. Under the letter: **Save**, **Share**, and **Listen** (it reads it aloud).
3. One arrives each day and they don't pile up: if you don't open it one day, nothing is left pending.
4. On special dates (Christmas, Easter, your tradition's feasts) you get that day's letter.
5. Every letter you've received stays in Journal → Letters.

Group letter

For prayer, study, or practice groups: everyone gets the same letter each day, with a question to talk about.

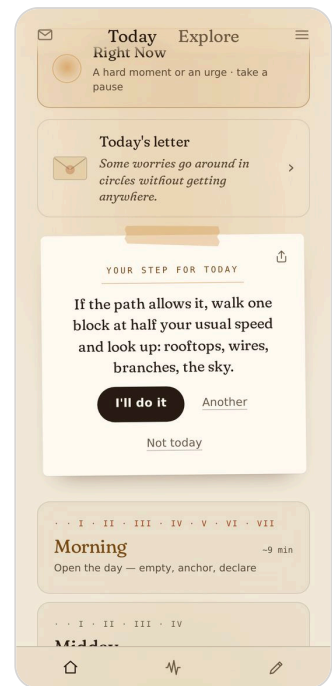

1. In Journal → Letters, tap “Create a code for my group” and share it.
2. Whoever gets it enters it in the same place and taps “Join.”
3. Everyone reads the letter in their own language; it's the same letter.
4. “Leave the group” takes you back to your personal letter.

Your step for today

One small action a day, on a note under your letter. It arrives when you open the letter, or at noon.

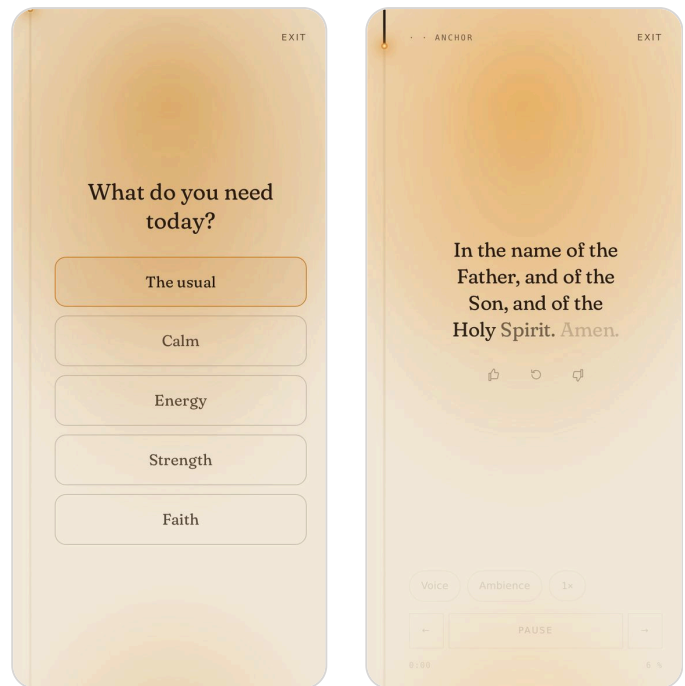

1. “I’ll do it” sets it aside for today; “Another” gives you a different one; “Not today” removes it, no guilt.
2. When you're done, tap “Done” and, if you like, note what you noticed.
3. Whatever wasn't done leaves at 5:00. No streaks, no to-dos.
4. The steps you took stay in Journal → Steps. You can turn them off in Settings.

Your rituals: Morning, Midday, and Night

Morning (about 9 minutes) opens the day; Midday (3 minutes) brings you back to center; Night (about 6 minutes) lets the day go.

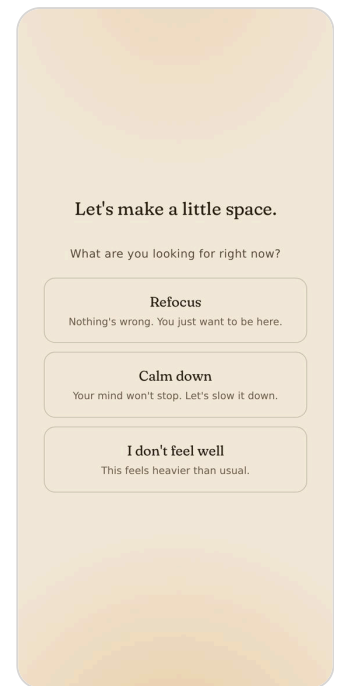

1. Tap a ritual in Today. Choose what you need (The usual, Calm, Energy, Strength, or Faith) and tap the candle to begin.
2. Each line appears word by word. If it's long, it scrolls on its own so your reading stays mid-screen.
3. At the bottom: **Voice** (read aloud), **Ambience** (background sound), speed, ← → to go back or skip, and **Pause**.
4. Under each line: 📖 “this helps,” 🔁 “repeat” (reads it again from the start), and 🚫 “not for me” (it stops appearing).
5. At the end you can write what you're taking with you. In “Customize my rituals” you change, remove, or add lines.

Right Now

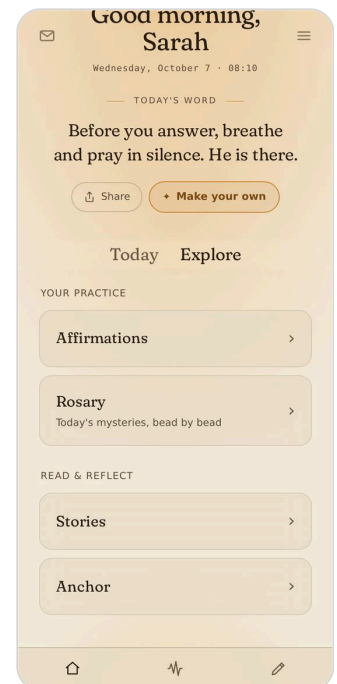

For a hard moment or an urge: a guided pause, whenever you need it.

1. Choose what you're looking for: to refocus, to calm down, or "I don't feel well."
2. Mark how strong it feels and breathe with the guide.
3. At the end you see how you were and how you are, plus a suggestion for the next few minutes.
4. If it's too much, helplines for your country appear right there.

Explore

1. **Affirmations:** lines by theme. Save your favorites or write your own.
2. **Manifestation (369):** only in the Spiritual and A mix profiles.
3. **Meditation:** guided audio meditations, when available in your language.
4. **Rosary:** on the Catholic path (see below).
5. **Stories** and **Anchor:** stories to read, and lines and psalms to come back to calm.

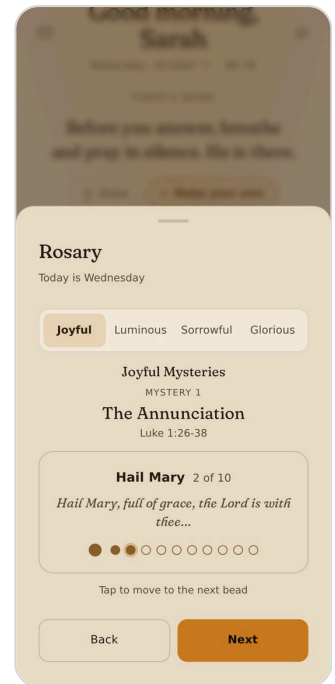

10

Rosary

On the Catholic path. It opens with the day's mysteries: Joyful, Sorrowful, Glorious, or Luminous. You can pick others at the top.

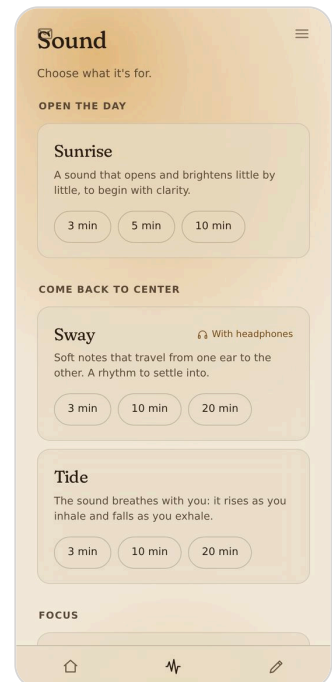

1. Tap the card to move to the next bead: Sign of the Cross, Creed, Our Father, three Hail Marys, Glory Be, and the five mysteries with their decades.
2. Each mystery shows its Gospel passage.
3. Only the opening of each prayer appears: you pray it in full, at your own pace.
4. It keeps no record and doesn't count days.

11

Sound

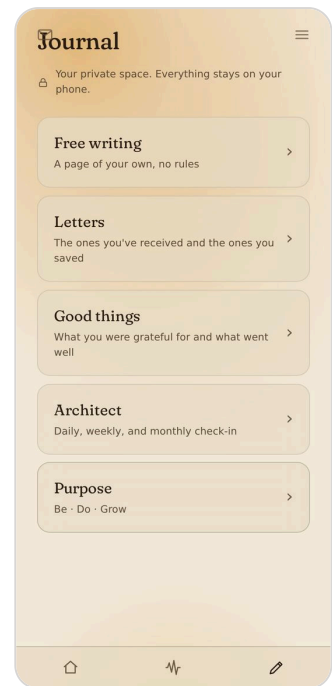

1. Sounds generated live, grouped by intention: open the day, come back to center, focus, and sleep.
2. Choose the length. The ones marked "with headphones" sound best that way.
3. This section also has focus blocks (pomodoro) and the timer with alarm.

Journal

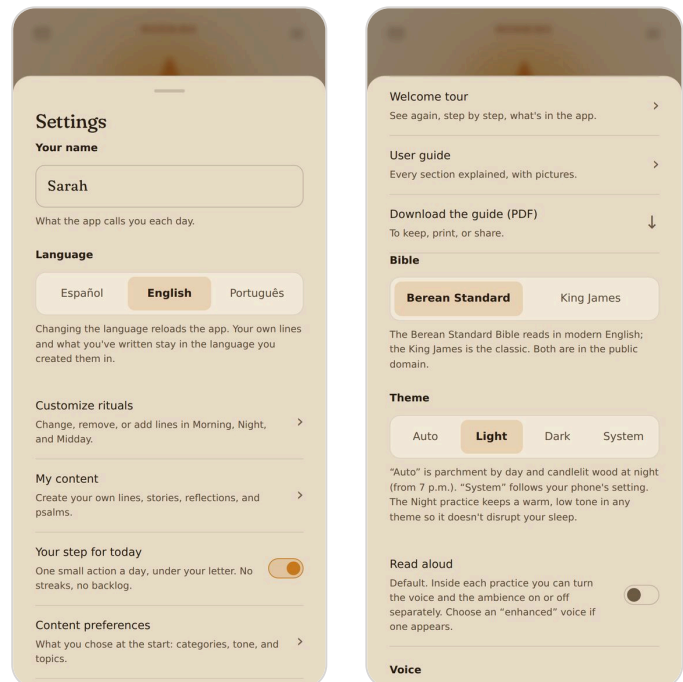

Your private space. Everything is saved only on your phone.

1. **Free writing:** a page of your own, no rules.
2. **Letters** and **Steps:** what you've received and what you did.
3. **Good things:** what you were grateful for and what went well.
4. **Architect:** daily, weekly, and monthly check-ins.
5. **Purpose:** three lines (Be · Do · Grow) that show up in your Morning ritual.

Settings

1. Your name and the language of the whole app. In English you choose the Bible: Berean Standard or King James.
2. Customize rituals, My content (your lines, stories, reflections, and psalms), Your step for today, and Content preferences (tradition and themes).
3. Theme (Auto, Light, Dark, or System), reading voice and speed, and background sound.
4. **Reminders:** add them to your calendar so they arrive even when the app is closed.
5. **Backup:** “Export data” saves a file with everything; “Import data” restores it on another phone.
5. The **Welcome tour** and this guide are here, online or as a PDF.

Privacy and help

1. Your data stays on your phone. Denha doesn't ask for an account and doesn't send what you write to any server.
2. If you delete the app or your browser data, it's gone: make a backup now and then.
3. Denha is a contemplative well-being tool. It is not a substitute for medical, psychological, or crisis care. Helplines are in Settings → Helplines and in “Right Now.”
4. Bible texts: Reina-Valera 1909, Berean Standard Bible, King James Version, and Almeida 1911, all in the public domain.

Denha is a contemplative well-being tool. It is not a substitute for medical, psychological, or crisis care.
